

Reducing HIV Stigma and Gender-Based Violence

Toolkit for Health Care Providers in India

Jyothsna
Mirza Tajuddin

Acknowledgments

This toolkit was developed as the major output of the Reducing Stigma and Violence Toolkit for Health (SVTH) project. This project was jointly organized by the International Center for Research on Women (ICRW) and Boruka Public Welfare Trust (BPWT), and funded by the Levi Strauss Foundation.

This project built on two training manuals developed through ICRW's earlier projects: (1) the Stigma and Violence Reduction Intervention Project, conducted in Andhra Pradesh, India (2003–2005), with interventions geared toward transient populations; and (2) the HIV Stigma Reduction Toolkit (2001–2003), designed for use among communities in high-prevalence areas in Africa.

The SVTH project adapted these earlier toolkits for use with a new target group: health care providers. This toolkit was pilot-tested with health care providers in Ichchapuram District, Andhra Pradesh.

The toolkit was developed collaboratively by:

- ICRW staff and consultants—Jyothisna Avula, Sandra Bunch, Nata Duvvury, Nanda Kannuri, Ross Kidd, Jennifer Nadeau, Nandini Prasad, Mirza Tajuddin, Sandy Won and Margo Young; and
- BPWT staff—Krishanu Battacharya, Raja Rao Bugala, Sushma Das, Ramesh Ginni, Ishita Mazumdar and Jhansi Ratnala.

Graphics were produced by Srinivas Kurella.

Health care providers in Ichchapuram District, where the toolkit was tested, also made a huge contribution. Their enthusiastic participation during the field tests gave the toolkit the benefit of their ideas and experience and helped to keep it focused on the practical needs and challenges of people who work on the HIV and AIDS issue.

Nata Duvvury
Project Director

Copies of this manual are available from ICRW's Web site: www.icrw.org.

Table of Contents

Introduction to the Toolkit	5
Why Focus on Stigma and Gender Violence?	7
Why Include Gender Violence in HIV and AIDS Prevention Efforts?	8
Purpose of the Toolkit	9
The Toolkit Modules	10
How the Toolkit Is Organized	11
Making Your Own Training Program	13
Methods and Materials	15
Tips for Participatory Trainers	17
Strategies and Approaches	20
What Have Health Workers Learned?	21
Chapter A: HIV Stigma – Naming and Owning the Problem	22
A1. Introduction to Stigma – Animal Cards	24
A2. Naming HIV Stigma Through Pictures	27
A3. How It Feels to be Stigmatized (Reflection Exercise)	30
A4. How It Feels to be Stigmatized (Testimonials)	33
A5. Stigma and Violence in Different Contexts	35
A6. Naming Stigma in Our Own Workplace	39
A7. Stigma Walk – Mapping Stigma in a Health Facility	44
A8. How Health Providers Are Stigmatized	46
A9. Forms, Effects and Causes of Stigma – Problem Tree	48
A10. Effects of Stigma and Gender Violence	51
A11. Effects of Stigma on the HIV Epidemic	54
A12. When HIV Enters the Home – Stigma and Violence	55
A13. Women’s and Men’s Life Cycles – Stigma and Violence	59
A14. Comparing AIDS, Cancer, Leprosy, TB, etc.	63
A15. Review – Ten Questions on HIV Stigma	65
Chapter B: Gender Violence – Naming & Owning the Problem	66
B1. Naming Gender Violence Through Pictures	69
B2. Forms, Effects and Causes of Violence – Problem Tree	74
B3. How It Feels to Be Abused – Reflection Exercise	79
B4. Violence in the Workplace – How We Respond to Cases of Battered Women	81
